Arithmetic Computation & Sorting

This problem computes different arithmetic expressions
and Sorts the results

UC 1

Write program to
take three inputs –
a, b & c

UC 2

Compute $a + b * c$

UC 3

Compute $a * b + c$

- Assume Part time Hour is 8

UC 4

Compute $c + a / b$

UC 5

Compute $a \% b + c$

UC 6

Store the results in
a Dictionary for
every Computation

UC 7

Read the values
from the Dictionary
into the array

UC 8

Sort the results to
show the
Computation Result
in the Descending
Order

UC 9

Sort the results to
show the
Computation Value
in Ascending Order
